

SEEING THE FUTURE IS SURPRISINGLY EASY.

Sedarū® helps utilities – not just in real-time – but ahead of time, to prepare them to manage risk and make impactful decisions. Leverage the experience and knowledge from all your utility groups. Best of all, you don't have to be a computer pro – Sedarū makes modeling and informed decision making easy.

 **SEDARŪ**®
What happens next™ >>

AROI

Integrated, risk-based asset management brings increased ROI to capital projects

Consistently improve customer service levels and reliability by including criticality and consequence in every decision

VALIDATE MODEL WITH REAL-TIME, FIRE-FLOW OBSERVATIONS FROM THE FIELD

MAKE CAPITAL PLANNING DECISIONS WITH INPUT FROM MULTIPLE SOURCES (SILOS)

Real-time, agile hydraulic model calibration with connected, field-validated system performance

OPTIMIZE ON ENERGY, WATER QUALITY, AND WATER LOSS WITH INCREASED OPERATIONAL AWARENESS AND PREPAREDNESS

Enable water system simulations for planning and network operations, without being an expert modeler

20%

INCREASE TO ASSET REPLACEMENT ROI

INCREASE OPERATIONAL AWARENESS ACROSS THE ORGANIZATION WITH INTUITIVE NETWORK MODELING APP

Real-time, connected network simulations for coordinated response to system events
