

optimize OpEx

Automated, map-driven notifications and real-time, paperless dispatching within a turnkey event management system. Access and drive your digital, integrated network.

manage work & resources

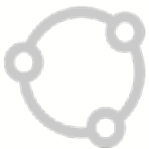

Dispatch, track, trend, monitor, and report-on investigations and work orders across any asset. Schedule work, assign to nearest field crew, track labor, equipment, material.

connect your team

Connect and mobilize your team. Call Centers to Field Crews, Engineers to Operators - viewing the same data, at the same time, contributing to solutions, together.

integrate network data

Apply enterprise data from SCADA, Network Sensors, GIS, Hydraulic Model, AMI, Legacy CMMS and more. Connect systems from across the network in one easy-to-use interface.

make real-time decisions

Access and analyze data and performance metrics instantly. Respond to events proactively with real-time monitoring, dynamic KPIs, trending and reporting.

predict, drive performance

Understand the source of loss and predict operational impacts on customers, facilities, and asset life. Optimize asset management with preemptive O&M.

Sedaru OMNI

Bringing together Operations Management and Network Intelligence

Key features of OMNI

Enterprise Work Order Management

- Assign, schedule, track work in real-time
- Analyze, trend productivity analytics
- Automate reports across any asset
- Track maintenance history of assets
- Locate, assign work to nearest crews
- Water, sewer, public works & more

Sensor & Data-driven Network Intelligence

- Monitor, trend network performance
- Operational KPIs, alarms, & notifications
- Forecast operations, respond proactively
- Dispatch, resolve incidents in the app
- Measure cost, performance, efficiency
- Optimize water loss, quality, energy

Sedaru Overview: Driving the digital utility with software & services for operational management and network intelligence: GIS, CMMS, field mobility, system monitoring and modeling for the enterprise. Sedaru streamlines workflows, extends the life of existing systems, and unifies disconnected departments within one, easy-to-use app for operating efficiency and compliance.
